

EQS
THIS IS FOR YOU,
WORLD.

A NEW FORM FOR A NEW TIME.

In the all-electric EQS, the pioneering synthesis of luxury and a holistic approach becomes a reality. As the first premium saloon from Mercedes-Benz to be designed from scratch as an electric car, the EQS impresses with the sensual clarity of its puristically elegant one-bow design and coupé-esque silhouette. The athletic overall appearance is rounded off by high-quality 21" AMG rims and futuristic LED tail lights in a 3D helix design.

FROM ANOTHER STAR.

The iconic Black Panel radiator grille with the three-dimensional Mercedes-Benz pattern is an affirmation of the brand's highest standards. And nowhere does this affirmation present itself as impressively as on the front of the EQS. Sophisticated, prominent and demonstrating the utmost attention to detail, it helps create the best first impression you could wish for.

TURNING POINT.

The electromechanical rear axle steering in the EQS ensures thoroughly effortless superior handling as standard. It influences handling in three ways: a smaller turning circle in town, more dynamism in bends and increased stability at high speeds. It has a standard turning angle of 4.5 degrees.

LUXURY UPDATE.

In terms of interior design, too, the EQS remains systematically visionary. The aim: a completely new way of digitalising the interior. The decisive element here is the MBUX Hyperscreen: a new feature made up of three displays behind a curved real glass surface – and the digital heart in the high-quality interior of the EQS. An optional head-up display with augmented reality improves safety and comfort in equal measure. And thanks to uncomplicated over-the-air updates you can subsequently activate or even order new optional functions, for example special drive programs such as the Teenage Drive Mode.

Due to supply bottlenecks, the MBUX Hyperscreen may not be available at the time of purchase.

EVEN THE INTERIOR AIR IS OF THE HIGHEST QUALITY.

The issue of indoor air quality was also taken to the next level in the development of the EQS. With a filter efficiency of up to 99.65%, the new HEPA (High Efficiency Particulate Air) fine particle filter can clean the incoming air of the smallest particles such as pollen and fine dust and neutralise unpleasant odours. The result is a new feel-good climate, thanks to ENERGIZING AIR CONTROL Plus.

Due to supply bottlenecks, the MBUX Hyperscreen may not be available at the time of purchase.

Ambient lighting.

With the ambient lighting you are experiencing a technological leap. It links aesthetics with innovative driver information and extended functions. Circumferential light strips and trim elements merge to form an additional level of lighting that also incorporates and visually supports the driving assistance systems.

Innovative materials & trim elements.

Progressive luxury, highly exclusive: with the optional Exclusive Nappa Leather Package you enjoy a first-class atmosphere. The tasteful interplay between neva grey comfort seats, biscay blue elements and details in rosé gold is as exciting as electric driving itself. The highlights also include the optional illuminated designer seat belt buckles.

Rear Seat Package.

Transform the rear into a feel-good lounge: experience an impressive level of seating comfort, courtesy of electrically adjustable seat backrests and seat climate control. The comfort armrest promotes relaxed travelling – not least thanks to double cup holders and an integrated inductive charging facility.

Fully electric, fully networked: the EQS with Mercedes me connect.

With the wide range of available Mercedes me connect Remote and Navigation Services your EQS is fully networked. From Pre-entry climate control of the interior to protecting personal data when the driver changes – you can easily control everything via your smartphone.

MBUX High-End Rear Seat Entertainment System (optional).

Enjoy first-class entertainment: that means entertainment via two high-resolution fully integrated 29.5 cm (11.6-inch) displays. With this optional system you can enjoy the full MBUX experience in the rear, too, with direct access to vehicle functions. You have the choice between touch and voice input for operation.

Due to supply bottlenecks, the MBUX High-End Rear Seat Entertainment System may not be available at time of purchase.

AMG Line exterior.

The expressive styling of the AMG Line lends the exterior of your EQS an exciting and dynamic touch. Sporty AMG genes meet progressive luxury – your clear statement for linking exceptional design with equally exceptional technology. Alongside the electro-aesthetics of the interior, the multifunction sports steering wheel in nappa leather with flattened bottom section and perforated grip area, for example, enhances driving pleasure. The sports seats with a dynamic seat upholstery layout provide you with good lateral support.

Electric Art interior.

With the standard Electric Art interior you feel progressive luxury in every fibre of the interior. Shapely comfort suspension seats with elegant contour illumination invite you to take your place at the multifunction steering wheel in nappa leather. You can also choose from various colour schemes, which are atmospherically showcased by the ambient lighting.

The new EQS.

The Mercedes-AMG EQS 53 4MATIC+.

Every Mercedes-AMG is a masterpiece in its own right, with an unmistakable character. What unites our performance vehicles and sports cars is their irrepressible sporting spirit. Their passion for top performance. It is generated at the point where engineering skill meets a very special attitude: the spirit of AMG. We believe that you have to keep on challenging limits in order to achieve new goals. We accept nothing as a given. Because limits are imposed by people, and it's also people who can overcome them. It's this attitude that enables us to achieve outstanding performance for motor racing - and for the road.

Welcome to the world of AMG.

Technical data.

	EQS 450+	Mercedes-AMG EQS 53 4MATIC+
Rated output (peak output) ¹ (electric) (kW [hp])	245 [333]	484 [658]
Rated torque of electric motor ¹ (Nm at rpm)	565 / 4,060	950
Acceleration from 0 to 100km/h (s)	6.2	3.8
Top speed (km/h)	210	220
Equivalent CO ₂ emissions (g/km)	74	92
Combined electrical consumption ² (kWh/100km)	18.3	23.0
WLTP electric range (km)	631	513
DC charging time 10–80% SOC (net) 50 kW (min) approx.	90	90
AC charging time 10–100% SOC (net) Wallbox/public 7.4kW WEU (h) approx.	13	13
Battery type/net battery capacity (kWh)	107.8	107.8
Luggage compartment capacity (l)	610	580
Kerb weight/payload (kg)	2,480 / 465	2,655 / 570
Permissible gross mass (kg)	2,945	3,225

¹ Peak power output, and torque figures in accordance with Directive 80/1269/EEC in the currently applicable version. ² Energy consumption figures are derived from combined tests & tested by local regulations in accordance with UN ECE R101. Under real-life driving conditions deviations may occur in comparison to the certified standard values. The actual values are influenced by a number of individual factors, such as personal driving style, environmental and route conditions. Further technical data may be found on www.mercedes-benz.com.sg.

Dimensions.

All figures in millimetres. The pictured dimensions are mean values. They are valid for vehicles with standard equipment and in unladen condition.

SPORT — F O R — GOOD

For 20 years now it has been our belief that sport has the power to connect people and motivate them in a unique way. We have facilitated urgently needed access to our support programmes for millions of children and young people, so helping them to achieve positive change in their lives. The programmes that we support together with Laureus Sport for Good are in line with the United Nations' Sustainable Development Goals and are part of an exciting major global movement to effect positive change in the world. **In buying a Mercedes-Benz you are supporting the “Laureus Sport for Good” movement.**

Please note: changes may have been made to the product since the editorial deadline (September 2023). The manufacturer reserves the right to make changes to the design, form, colour and the product specification during the delivery period, provided these changes, while taking into account the interests of the vendor, can be deemed reasonable with respect to the purchaser. Where the seller or the manufacturer uses symbols or numbers to describe an order or the subject of an order, no rights may be

derived solely from these. The illustrations may show accessories and items of optional equipment which are not part of standard specification. For current and more specific information in relation to the regulations and requirements in your own country and their consequences, please contact our authorised dealer. **www.mercedes-benz.com.sg**
